Gentlemen:

Thank you for asking about our CADM Rotary Collator.

Attached is descriptive literature which we believe you will find of interest.

The machine requires no maintenance. Even the bearings are self-lubricating. Set-up is instantaneous. No downtime will ever be encountered. Its output is extremely flexible inasmuch as operators, from one to seven, can be added or removed as required.

An ever-growing list of satisfied users, as you can see from the partial list attached, are reporting savings in time, money, operator fatigue, etc., which makes us feel that if you have a gathering or collating problem, the CADM Rotary Collator will help you too.

We hope this answers all of your questions.

Attached is a return-address postcard on which you may request further help. We hope to hear from you soon.

Yours very truly,

The Wadsworth Manufacturing Company,

John T. Looney
